ABOUT Polycab

Polycab India Limited (PIL) is India's largest manufacturer of Wires and Cables and one of the fastest growing FMEG companies with a consolidated turnover of INR 122+ billion in FY22. PIL is at the forefront of providing innovative, safe and energy efficient products to a diverse set of customers via a strong distribution network of 4,600+ authorized dealers and 205,000+ retail outlets.

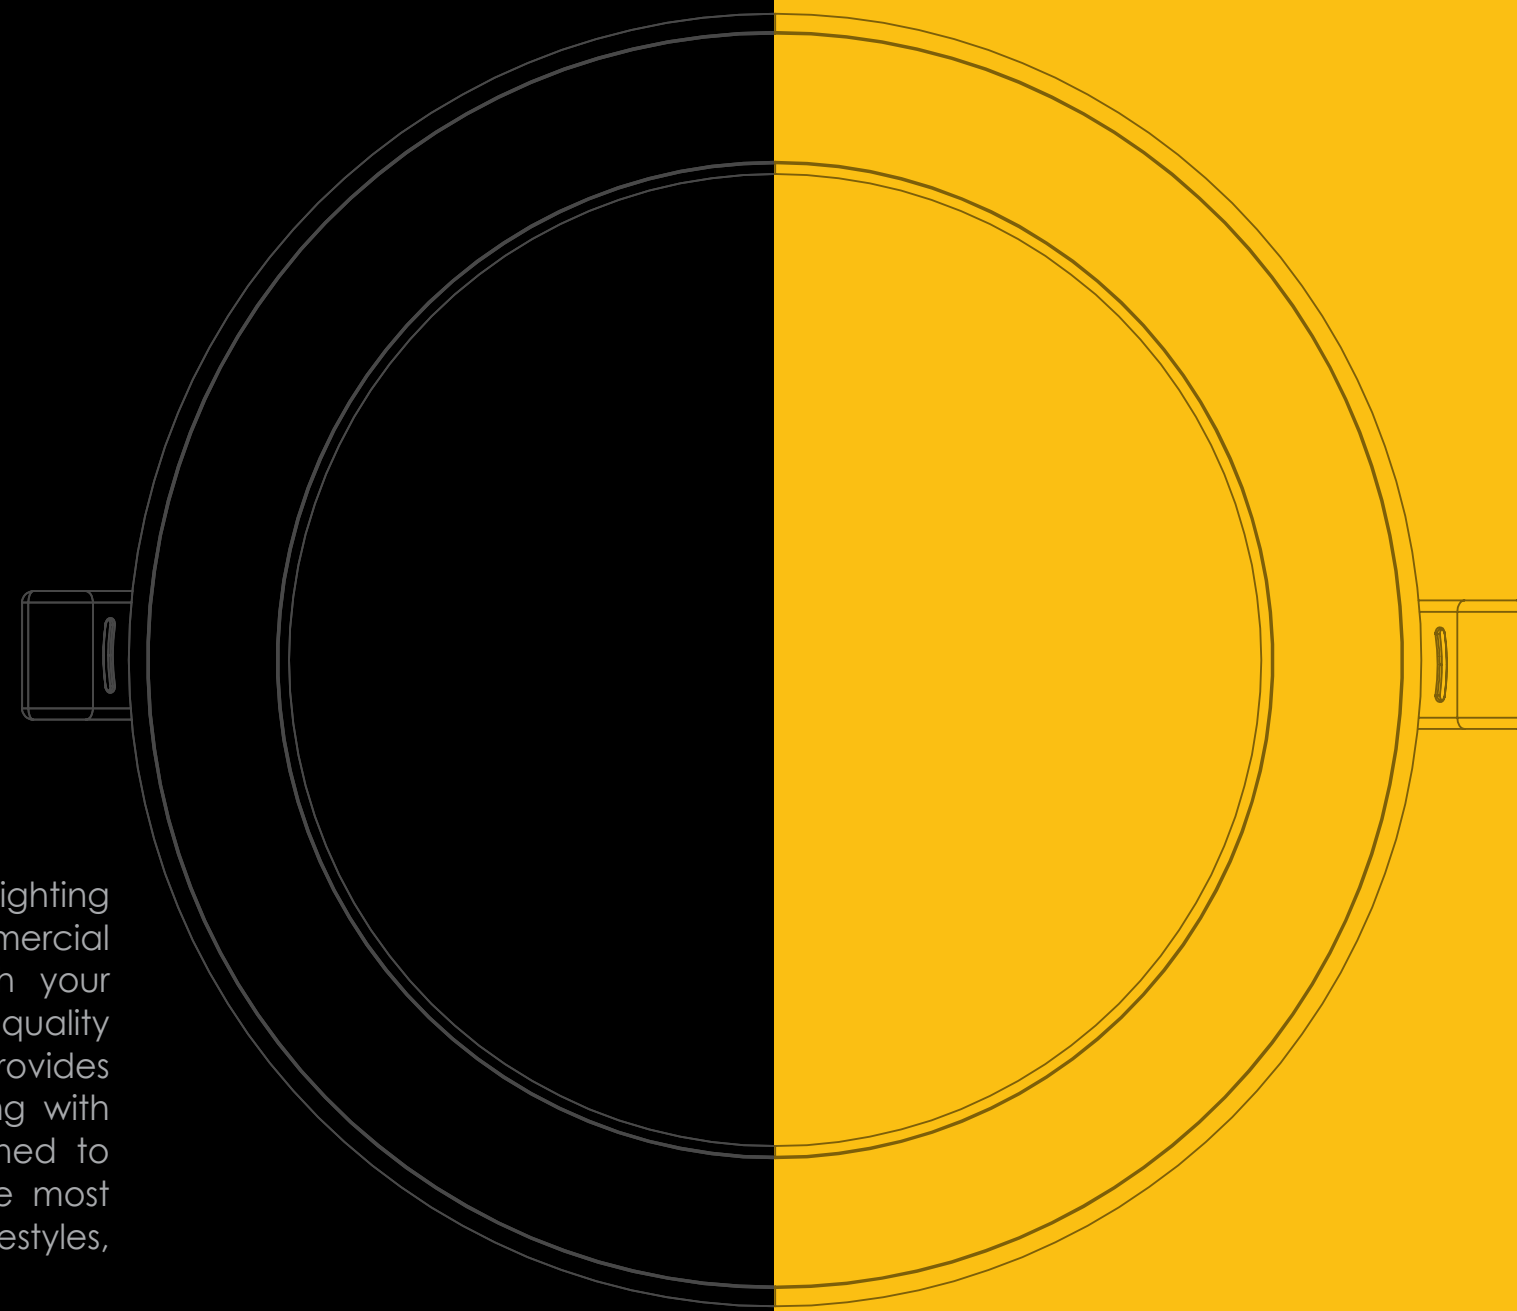

PIL's business operations span across India through 25 manufacturing facilities, 15+ offices and 25+ warehouses. PIL has also served customers in 60+ countries globally. PIL's 4,400+ employees are dedicated to upholding robust governance practices, preserving a customer centric culture, having a purpose to serve the communities, and imbibing a genuine sense of ecological consciousness.

For further information, please visit www.polycab.com

WHY Polycab **LED** Lighting?

Polycab offers you complete LED lighting solutions – for residential, commercial and industrial purpose to match your application. Designed using high quality materials, each LED solution provides high efficiency performance along with durability. Each product is designed to complement and co-ordinate the most exclusive interior and exterior lifestyles, from classic to contemporary.

We are committed to offer the widest range of energy-efficient LED lighting solutions coupled with latest technology, service and advice.

LIGHTING BASICS

What does LED stand for?

LED stands for Light Emitting Diode.

What's The Difference Between Warm Lighting And Cool Lighting?

The difference is in the Colour Temperature of the light. Warm light emits a colour that resembles slightly yellow light, while cool light resembles slightly blue lights. The Kelvin scale (K) measures the colour temperature. If the temperature is between 2700-3000K, then the LED fixture emits warm light, if between 5500-6500K, then it emits cool light and if anything, in between, the fixture emits regular daylight colour light.

Use warm lights in spaces such as bedrooms and the living rooms. Cool lights can be used in kitchens, bathrooms, study areas and for work-spaces. Daylight color can be used for regular activities like leisure reading, meditation, et al.

WHAT IS BEAM ANGLE?

BEAM angle is a unit of measurement of light distribution. A wide angle signifies wider spread of light, albeit with low intensity. A narrow beam signifies very narrow area of illumination with high intensity of light and focus.

LED Spot Lights with a beam angle of 30°-40° are used to highlight paintings, décor and are majorly used to accentuate in art galleries, living rooms, hallways and fashion/jewelery retail outlets.

WHAT IS LUMEN?

Watts measure energy usage, Lumens indicate the light output/brightness levels that the LED fixture emits.

Higher the Lumens value, brighter the light. Lower the Lumens value, dimmer is the light output.

DO LED BATTENS REQUIRE SEPARATE HOLDER?

LED Battens do not require separate holder, tube and choke. They are all seamlessly integrated into one single unit.
